Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

In view of the Appeal Brief filed on 9/18/08, PROSECUTION IS HEREBY REOPENED. The claims are rejected as set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:/Brian E. Glessner/

Supervisory Patent Examiner, Art Unit 3633

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(c) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 6-11, 13-18, 20-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Moon et al (6892497).

Moon (figures 2, 14) shows a cover comprising a first segment (404) having a longitudinal axis, an interior surface and having an arcuate exterior surface disposed generally opposite the interior surface and perpendicular to the length of the axis, the arcuate exterior surface of the first segment of at least one substantially sheet like and substantially rigid structure, having at least one affixing member (the structure where part 440 goes into, figure 17), a second segment (406, figures 14-16) having a substantially flat surface, a plurality of ribs disposed between and joined to the inner surface of the first segment and the substantially flat surface of the second segment, a plurality of attachment elements (416) disposed on the ribs, the second segment is substantially rigid, the cover is substantially hollow, the first segment having an access opening, the second segment having an access opening.

With respect to the limitations to the core and the method of usage thereof, the elected invention is to the cover only and the limitations to the cover are also fully met by the reference above, and the reference is able to function as claimed.

Response to Arguments

1. Applicant's arguments with respect to claims 1-4,6-11,13-18,20-21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different covering device.
